ICE BREAKERS

Hackathon

1) Choose one emoji for your group

The participants have to describe their group with 1 or 3 emojis, what emoji would you be? And why:)

2) Show and tell

A color is told to the group and a participant has to find an item of that color in their room and tell the story of it. Imagine there is a fire what would you take with you? could be one of the questions asked about a certain item.

3) Never have I ever

The host starts by asking a question for example never have I ever tried sushi? The participants can interact either with Zoom thumbs up or thumbs down or in the chat as well.

4) Virtual Vocation

Take a picture of your view from the nearby window and show. If it is in the group the participants can send each others their pics and choose the best one and describe it as if they are a guide. Persuade the others why should they visit this place.

5) Describe your group with a meme

Participants are divided into groups and in separate Zoom Rooms they have to find a meme that gives a vibe of their group and share them with others and explain. They can make a meme themselves as well:)
